

ARCHITECTURAL SERVICES

The full range of architectural services required for the successful design, build, upgrade and refurbishment of living quarters and associated facilities is provided by Aiken Group.

Development of detailed arrangements for living quarters' design, budgeting and modification to meet both offshore regulations and cost reduction is a core service.

Capabilities include:

- **Offshore surveys**
- **Conceptual studies**
- **Front-end engineering design (FEED)**
- **Detailed design**
- **Engineering, procurement and construction (EPC)**
- **Project management**
- **Construction support engineering**
- **Application of best-in-practice solutions**

From conception to completion, experienced project managers provide supervision of design, procurement, construction, installation and certification. Fully qualified technicians install equipment in areas such as laundry, galley, mess and recreation and provide after-sales service and maintenance.

All new builds, upgrades, modifications and refurbishments fully comply with relevant legislation and standards.
