CONSTRUCTION SERVICES

Aiken Group's managerial and construction expertise, allied to detailed planning and cost control, results in successful implementation of contracts.

Full on-site project management, engineering and construction support is provided for such as modifications, upgrades and special periodic surveys of drilling rigs, and for upgrades and maintenance of production platforms and marine facilities.

Construction services extend from conceptual studies and front-end engineering and design through to project close-out and include:

- Bid and vendor appraisal
- Sub-contract awards
- Factory acceptance testing
- HAZOP/HAZID studies
- Detailed engineering and procurement
- Fabrication and installation
- Testing and commissioning
- Legislative and regulatory compliance
- Quality assurance
- Costs reconciliation
- HS&E
